INDEX OF SUBJECTS AND AUTHORS

Abortion, Pulmonary abscess following, 594
Abscess of the lung, 107
——, Pulmonary, following abortion, 594
Accidental pneumothorax, 586
Acid-fast bacteria, A comparison of the Schulte-Tigges and Ziehl-Neelsen methods for staining, 102
Acquired resistance to tuberculosis, the problem of natural and: President's address, 485
Action, therapeutic, of oleum jecoris, An explanation of the, 549
Activity, Pulmonary, greatest at the apex and least at the base, 142
——, tuberculin, The relation of serological reactions and, in derivatives of tubercle bacilli, 23
Advanced pulmonary tuberculosis, surgery in, What can be accomplished by, 69
Allergy and immunity in tuberculosis, The influence of frequently repeated reinfections on, 316
Alpine lamp, Blood chemistry changes in children produced by exposure to the, 479
American Indians, tuberculous lymphadenitis among, treatment of, The, 646
Annular shadows appearing in radiograms of the lungs, The interpretation of, 58
Apex, Pulmonary activity greatest at the, and least at the base, 142
ARMSTRONG, DONALD B. Certain historical and epidemiological observations on tuberculosis, 177
ARNOLD, A. W., AND GREISHEIMER, E. M. Blood chemistry changes in children produced by exposure to the Alpine lamp, 479
Artificial pneumothorax and thoracoplasty, Combined, 135
ATKINSON, CHARLES E. Pulmonary neoplasms, 556
AUSTRIAN, CHARLES R., AND WILLIS, HENRY STUART. The pulmonary effects of intratracheal injections of tubercle bacilli and blood in rabbits, 306

Bacilli, tubercle, and blood, The pulmonary effects of intratracheal injections of, in rabbits, 306
——, ——, derivatives of, The relation of serological reactions and tuberculin activity in, 23
——, ——, The dissemination of, in the immune guinea pig, with a discussion of probable factors involved in tuberculo-immunity, 211
Bacillus, tubercle, effect of sanocrysin on the, after long exposure in vitro, The, 523
——, ——, The principles of bacteriological chemical analysis and their application to the, in reference to the large-scale production of tuberculin, 30
Bacteria, acid-fast, A comparison of the Schulte-Tigges and Ziehl-Neelsen methods for staining, 102
——, chemical study of, The. XI. The development of a systematic analytical method for the comparative study of bacterial cells, 164
Bacterial growth, The effect of beta-rays on, 172
Bacteriological chemical analysis, The principles of, and their application to the tubercle bacillus in reference to the large-scale production of tuberculin, 30
BAILEY, W., LAIRD, A. T., AND GUYER, L. Notes regarding tuberculous infection in northeastern Minnesota, 193
Base, Pulmonary activity greatest at the apex and least at the, 142
Beta-rays, effect of, on bacterial growth, The, 172
Birth, Brehmer's, The centenary of, 207

Blood chemistry changes in children produced by exposure to the Alpine lamp, 479
—— supply, The tracheobronchial lymph nodes of the rabbit, and their, 237
——, The pulmonary effects of intratracheal injections of tubercle bacilli and, in rabbits, 306
BOISSEVAIN, C. H. The effect of beta-rays on bacterial growth, 172
Brehmer's birth, The centenary of, 207
BRUNS, E. H., AND BARNWELL, J. DUB. The interpretation of annular shadows appearing in radiograms of the lungs, 58
BURKE, JOHN W., AND MARIETTE, ERNEST S. The value of iodine in intensive doses in the treatment of tuberculosis, 89
BURNETT, CLOUGH TURRILL. Combined artificial pneumothorax and thoracoplasty, 135
BURNS, H. A., AND MYERS, J. A. Studies on tuberculosis in infancy and childhood. XII. A study of the lung hilum in a group of children examined for tuberculosis, 468

CARTER, H. G. Deductions from eight years of tuberculosis work among negroes, 653
Carter, Harry Gilmore, 1886–1926. Obituary, 344
Caulfeild, inhibitive reaction of, The: a study of its clinical value in pulmonary tuberculosis, 718
Cavity, pleural, Deflation of the, in the treatment of spontaneous pneumothorax, 80
Centenary of Brehmer's birth, The, 207
Certain historical and epidemiological observations on tuberculosis, 177
Chemical analysis, bacteriological, The principles of, and their application to the tubercle bacillus in reference to the large-scale production of tuberculin, 30
—— study of bacteria, The. XI. The development of a systematic analytical method for the comparative study of bacterial cells, 164
Chemistry, Blood, changes produced in children by exposure to the Alpine lamp, 479
Childhood, tuberculosis in infancy and, Studies on. VII. Serial examinations of children with evidences of primary foci, 428
——, —— —— —— ——, —— ——. VIII. Serial examinations of children with pulmonary lesions, 437
——, —— —— —— ——, —— ——. IX. The incidence of physical defects and nontuberculous disease among 2,000 children examined for tuberculosis, 448
——, —— —— —— ——, —— ——. X. Tuberculous infection among Minneapolis school children as revealed by the intracutaneous test, 454
——, —— —— —— ——, —— ——. XI. Serial examinations of infants showing positive tuberculin skin reactions while under two years of age, 461
——, —— —— —— ——, —— ——. XII. A study of the lung hilum in a group of children examined for tuberculosis, 468
Children, Blood chemistry changes produced in, by exposure to the Alpine lamp, 479
—— examined for tuberculosis, lung hilum in a group of, A study of the, 468
—— —— —— ——, The incidence of physical defects and nontuberculous disease among 2,000, 448
——, exposure of, to tuberculosis, Clinic records concerning the, 420
——, school, Minneapolis, Tuberculous infection among, as revealed by the intracutaneous test, 454
—— with evidences of primary foci, Serial examinations of, 428
—— —— pulmonary lesions, Serial examinations of, 437
Clinic records concerning the exposure of children to tuberculosis, 420
COLLINS, R. J., AND LESLIE, G. L. The treatment of tuberculous lymphadenitis among American Indians, 646
Combined artificial pneumothorax and thoracoplasty, 135
Comparison of the Schulte-Tigges and Ziehl-Neelsen methods for staining acid-fast bacteria, A, 102

Contagion of tuberculosis, The, 347
Coöperation of science and practice in tuberculosis, Remarks on the, 597
CORPER, H. J., AND LURIE, MAX B. The variability of localization of tuberculosis in the organs of different animals. I. Quantitative relations in the rabbit, guinea pig, dog and monkey, 662
——, ——. ——., —— ——, —— ——. The variability of localization of tuberculosis in the organs of different animals. II. The importance of the distribution of tubercle bacilli as concerns differences of susceptibility of the organs, 680
CUMMING, H. S. Address of welcome, 6

Deductions from eight years of tuberculosis work among negroes, 653
Defects, physical, and nontuberculous disease among 2,000 children examined for tuberculosis, The incidence of, 448
Deflation of the pleural cavity in the treatment of spontaneous pneumothorax, 80
Derivatives of tubercle bacilli, The relation of serological reactions, and tuberculin activity in, 23
Discharge from a sanatorium, Follow-up information on 1,747 tuberculosis patients one to seven years after, 625
Discussion of certain fundamental principles involved in heliotherapy, A, 496
—— —— the present methods proposed for the standardization of tuberculin, 17
Dissemination of tubercle bacilli in the immune guinea pig, The, with a discussion of probable factors involved in tuberculo-immunity, 211
Dogs, normal and tuberculous, effect of injections of sanocrysin on, The. Part II: On tuberculous dogs, 533
DROLET, G. J. Tuberculosis hospitalization in the United States, 600

Effect of beta-rays on bacterial growth, The, 172
—— —— injections of sanocrysin on normal and tuberculous dogs, The. Part II: On tuberculous dogs, 533
—— —— sanocrysin on the tubercle bacillus after long exposure in vitro, The, 523
Effects, pulmonary, of intratracheal injections of tubercle bacilli and blood in rabbits, The, 306
EICHELBERGER, LILLIAN, AND MCCLUSKEY, K. LUCILLE. The effect of injections of sanocrysin on normal and tuberculous dogs. Part II: On tuberculous dogs, 533
Eight years of tuberculosis work among Negroes, Deductions from, 653
Epidemiological observations on tuberculosis, Certain historical and, 177
EVANOFF, MAX, AND SWEANY, H. C. The effect of sanocrysin on the tubercle bacillus after long exposure in vitro, 523
Explanation of the therapeutic action of oleum jecoris, An, 548
Exposure of children to tuberculosis, Clinic records concerning the, 420
—— to the Alpine lamp, Blood chemistry changes produced in children by, 479

FERGUSON, R. G. Follow-up information on 1,747 tuberculosis patients one to seven years after discharge from a sanatorium, 625
Foci, primary, children with evidences of, Serial examinations of, 428
Follow-up information on 1,747 tuberculosis patients one to seven years after discharge from a sanatorium, 625
Frequently repeated reinfections, The influence of, on allergy and immunity in tuberculosis, 316
Fundamental principles involved in heliotherapy, A discussion of certain, 496

GREISHEIMER, E. M., AND ARNOLD, A. W. Blood chemistry changes in children produced by exposure to the Alpine lamp, 479
Growth, bacterial, The effect of beta-rays on, 172
Guinea pig, immune, dissemination of tubercle bacilli in, The, with a discussion of probable factors involved in tuberculo-immunity, 211
GUYER, L. G., BAILEY, W., AND LAIRD, A. T. Notes regarding tuberculous infection in northeastern Minnesota, 193

HARRINGTON, F. E., AND MYERS, J. A. Studies on tuberculosis in infancy and childhood. X. Tuberculous infection among Minneapolis school children as revealed by the intracutaneous test, 454

HEGNER, CASPER F. Accidental pneumothorax, 586

Heliotherapy in pulmonary tuberculosis, 505

——, principles involved in, A discussion of certain fundamental, 496

HETZLER, A. E., AND RICHDORF, L. F. Clinic records concerning the exposure of children to tuberculosis, 420

Hilum, lung, in a group of children examined for tuberculosis, A study of the, 468

Historical and epidemiological observations on tuberculosis, Certain, 177

Hospitalization, Tuberculosis, in the United States, 600

HOUCK, U. G. Tuberculosis of livestock, 8

HUNTLEY, W. B., AND STUCKY, GEORGE C. The Kahn test for syphilis in tuberculosis, 724

HUTCHINSON, DOROTHY, AND MYERS, J. A. Studies on tuberculosis in infancy and childhood. VIII. Serial examinations of children with pulmonary lesions, 437

——, ——, MYERS, J. A., AND LEGGETT, E. Studies on tuberculosis in infancy and childhood. VII. Serial examinations of children with evidences of primary foci, 428

Immune guinea pig, dissemination of tubercle bacilli in, The, with a discussion of probable factors involved in tuberculo-immunity, 211

Immunity in tuberculosis, The influence of frequently repeated reinfections on allergy and, 316

Incidence of physical defects and nontuberculous disease among 2,000 children examined for tuberculosis, The, 448

Indians, American, tuberculous lymphadenitis among, treatment of, The, 646

Infancy and childhood, tuberculosis in, Studies on. VII. Serial examinations of children with evidences of primary foci, 428

Infancy and childhood, tuberculosis in, Studies on. VIII. Serial examinations of children with pulmonary lesions, 437

—— —— ——, —— ——, —— ——. IX. The incidence of physical defects and nontuberculous disease among 2,000 children examined for tuberculosis, 448

—— —— ——, —— ——, —— ——. X. Tuberculous infection among Minneapolis school children as revealed by the intracutaneous test, 454

—— —— ——, —— ——, —— ——. XI. Serial examinations of infants showing positive tuberculin skin reactions while under two years of age, 461

—— —— ——, —— ——, —— ——. XII. A study of the lung hilum in a group of children examined for tuberculosis, 468

Infants showing positive tuberculin skin reactions while under two years of age, Serial examinations of, 461

Infection, Tuberculous, among Minneapolis school children as revealed by the intracutaneous test, 454

——, ——, in northeastern Minnesota, Notes regarding, 193

Infection, tuberculous, Studies on. XII. The dissemination of tubercle bacilli in the immune guinea pig, with a discussion of probable factors involved in tuberculo-immunity, 211

——, ——, —— ——. XIII. The tracheobronchial lymph nodes of the rabbit and their blood supply, 237

——, ——, —— ——. XIV. The localization of tuberculous infection in the rabbit, with particular reference to that in the lungs, 243

——, ——, —— ——. XV. Summary, analysis and applications of the studies on tuberculous infection, 271

Influence of frequently repeated reinfections on allergy and immunity in tuberculosis, The, 316

Inhibitive reaction of Caulfeild, The: a study of its clinical value in pulmonary tuberculosis, 718

—— —— —— tuberculosis serum, The: the nature of the inhibitive substance, 706

Injections, intratracheal, of tubercle bacilli and blood, The pulmonary effects of, in rabbits, 306
—— of sanocrysin, effect of, on normal and tuberculous dogs, The. Part II: On tuberculous dogs, 533
Interpretation of annular shadows appearing in radiograms of the lungs, The, 58
Intracutaneous test, Tuberculous infection among Minneapolis school children as revealed by the, 454
Intratracheal injections of tubercle bacilli and blood, The pulmonary effects of, in rabbits, 306
Iodine in intensive doses in the treatment of tuberculosis, The value of, 89

Jecoris, oleum, therapeutic action of, An explanation of the, 549
JOHNSON, TREAT B. The chemical study of bacteria. XI. The development of a systematic analytical method for the comparative study of bacterial cells, 164
——, —— ——. The principles of bacteriological chemical analysis and their application to the tubercle bacillus in reference to the large-scale production of tuberculin, 30

Kahn test for syphilis in tuberculosis, The, 724
KNOPF, S. ADOLPHUS. The centenary of Brehmer's birth, 207
KRAUSE, ALLEN K., AND WILLIS, HENRY STUART. The influence of frequently repeated reinfections on allergy and immunity in tuberculosis, 316
KRAUSE, ALLEN K. Studies on tuberculous infection. XII. The dissemination of tubercle bacilli in the immune guinea pig, with a discussion of probable factors involved in tuberculo-immunity, 211
——, —— ——. —— —— —— ——. XIV. The localization of tuberculous infection in the rabbit, with particular reference to that in the lungs, 243
——, —— ——. —— —— —— ——. XV. Summary, analysis and applications of the studies on tuberculous infection, 271

LAIRD, A. T., GUYER, L. G., AND BAILEY, W. Notes regarding tuberculous infection in northeastern Minnesota, 193
Lamp, Alpine, Blood chemistry changes in children produced by exposure to the, 479
LEGGETT, E., HUTCHINSON, DOROTHY, AND MYERS, J. A. Studies on tuberculosis in infancy and childhood. VII. Serial examinations of children with evidences of primary foci, 428
Lesions, pulmonary, children with, Serial examinations of, 437
LESLIE, G. L., AND COLLINS, R. J. The treatment of tuberculous lymphadenitis among American Indians, 646
Livestock, Tuberculosis of, 8
Localization of tuberculous infection in the rabbit, The, with particular reference to that in the lungs, 243
—— —— tuberculosis in the organs of different animals, The variability of. I. Quantitative relations in the rabbit, dog, guinea pig and monkey, 662
—— —— —— —— —— —— —— —— ——, —— —— ——. II. The importance of the distribution of tubercle bacilli as concerns differences of susceptibility of the organs, 680
LONG, ESMOND R. Discussion of the present methods proposed for the standardization of tuberculin, 17
Lung, Abscess of the, 107
—— hilum in a group of children examined for tuberculosis, A study of the, 468
Lungs, annular shadows appearing in radiograms of the, The interpretation of, 58
——, The localization of tuberculous infection in the rabbit, with particular reference to that in the, 243
LURIE, MAX B., AND CORPER, H. J. The variability of localization of tuberculosis in the organs of different animals. I. Quantitative relations in the rabbit, guinea pig, dog and monkey, 662
——, —— ——., —— ——, ——. ——. The variability of localization of tuberculosis in the organs of different animals. II. The importance of the distribution of the bacilli as concerns differences of susceptibility of the organs, 680

Lymphadenitis, tuberculous, among American Indians, treatment of, The, 646
Lymph nodes, tracheobronchial, of the rabbit, The, and their blood supply, 237

Manufacture and use of veterinary tuberculin, Present status of the, 10
MARIETTA, S. U. Abscess of the lung, 107
MARIETTE, ERNEST S., AND BURKE, JOHN W. The value of iodine in intensive doses in the treatment of tuberculosis, 89
MCCLUSKEY, K. LUCILLE, AND EICHELBERGER, LILLIAN. The effect of injections of sanocrysin on normal and tuberculous dogs. Part II. On tuberculous dogs, 533
MCPHEDRAN, F. MAURICE, AND OPIE, EUGENE L. The contagion of tuberculosis, 347
Methods proposed for the standardization of tuberculin, Discussion of the present, 17
Minneapolis school children, Tuberculous infection among, as revealed by the intracutaneous test, 454
Minnesota, northeastern, tuberculous infection in, Notes regarding, 193
MYERS, J. A., AND BURNS, H. A. Studies on tuberculosis in infancy and childhood. XII. A study of the lung hilum in a group of children examined for tuberculosis, 468
——, ——. ——., —— HARRINGTON, E. F. Studies on tuberculosis in infancy and childhood. X. Tuberculous infection among Minneapolis school children as revealed by the intracutaneous test, 454
——. ——. ——., —— HUTCHINSON, DOROTHY. Studies on tuberculosis in infancy and childhood. VIII. Serial examinations of children with pulmonary lesions, 437
——, ——. ——., —— NELSON, EDMOND. Studies on tuberculosis in infancy and childhood. IX. The incidence of physical defects and nontubercul us disease among 2,000 children examined for tuberculosis, 448
——, ——. ——., —— WAHLQUIST, H. F. Studies on tuberculosis in infancy and childhood. XI. Serial examinations of infants showing positive tuberculin skin reactions while under two years of age, 461
——, ——. ——., LEGGETT, E., AND HUTCHINSON, DOROTHY. Studies on tuberculosis in infancy and childhood. VII. Serial examinations on children with evidences of primary foci, 428

Natural and acquired resistance to tuberculosis, the problem of: President's address, 485
Negroes, tuberculosis work among, Deductions from eight years of, 653
NELSON, EDMOND, AND MYERS, J. A. Studies on tuberculosis in infancy and childhood. IX. The incidence of physical defects and nontuberculous disease among 2,000 children examined for tuberculosis, 448
Neoplasms, Pulmonary, 556
Nontuberculous disease among 2,000 children examined for tuberculosis, The incidence of physical defects, and, 448
Normal and tuberculous dogs, effect of injections of sanocrysin on, The. Part II: On tuberculous dogs, 533
Northeastern Minnesota, tuberculous infection in, Notes regarding, 193
Notes regarding tuberculous infection in northeastern Minnesota, 193

Obituary. Harry Gilmore Carter, 1886–1926, 344
Oleum jecoris, therapeutic action of, An explanation of the, 548
OPIE, EUGENE L., AND MCPHEDRAN, F. MAURICE. The contagion of tuberculosis, 347
Organs of different animals, localization of tuberculosis in the, The variability of. I. Quantitative relations in the rabbit, guinea pig, dog and monkey. 662
—— —— —— ——, —— —— —— —— ——
——, —— —— ——. II. The importance of the distribution of tubercle bacilli as concerns differences of susceptibility of the organs, 680

Patients, tuberculosis, one to seven years after discharge from a sanatorium, Follow-up information on 1,747, 625
PERLA, DAVID. The inhibitive reaction of Caulfeild: a study of its clinical value in pulmonary tuberculosis, 718
——, ——. —— —— —— —— tuberculosis serum: the nature of the inhibitive substance, 706
PETERS, LEROY S. Pulmonary abscess following abortion, 594
Physical defects and nontuberculous disease among 2,000 children examined for tuberculosis, The incidence of, 448
PINNER, MAX. The relation of serological reactions and tuberculin activity in derivatives of tubercle bacilli, 23
PLATONOV, G. An explanation of the therapeutic action of oleum jecoris, 549
Pleural cavity, Deflation of the, in the treatment of spontaneous pneumothorax, 80
Pneumothorax, Accidental, 586
——, artificial, and thoracoplasty, Combined, 135
——, Spontaneous, in pulmonary tuberculosis, 567
——, ——, treatment of, Deflation of the pleural cavity in the, 80
POLLOCK, WILLIAM C. Heliotherapy in pulmonary tuberculosis, 505
Positive tuberculin skin reactions, infants showing, while under two years of age, Serial examinations of, 461
POTTENGER, F. M. A discussion of certain fundamental principles involved in heliotherapy, 496
Practice in tuberculosis, coöperation of science and, Remarks on the, 597
Present status of the manufacture and use of veterinary tuberculin, 10
President's address: the problem of natural and acquired resistance to tuberculosis, 485
Primary foci, children with evidences of, Serial examinations of, 428
Principles involved in heliotherapy, A discussion of certain fundamental, 496
—— of bacteriological chemical analysis and their application to the tubercle bacillus in reference to the large-scale production of tuberculin, The, 30
Problem of natural and acquired resistance to tuberculosis, the: President's address, 485
Pulmonary abscess following abortion, 594
—— activity greatest at the apex and least at the base, 142
—— effects of intratracheal injections of tubercle bacilli and blood in rabbits, The, 306
—— lesions, children with, Serial examinations of, 437
—— neoplasms, 556
—— tuberculosis, advanced, surgery in, What can be accomplished by, 69
—— ——, Heliotherapy in, 505
—— ——, Spontaneous pneumothorax in, 567

Rabbit, tracheobronchial lymph nodes of, The, and their blood supply, 237
——, tuberculous infection in the, localization of, The, with particular reference to that in the lungs, 243
Rabbits, The pulmonary effects of intratracheal injections of tubercle bacilli and blood in, 306
Radiograms of the lungs, The interpretation of annular shadows appearing in, 58
Rays, beta, effect of, on bacterial growth, The, 172
Reaction, inhibitive, of Caulfeild, The: a study of its clinical value in pulmonary tuberculosis, 718
——, ——, —— tuberculosis serum, The: the nature of the inhibitive substance, 706
——, sedimentation, red cell, technique of, The, 94
Reactions, serological, and tuberculin activity in derivatives of tubercle bacilli, The relation of, 23
——, skin, tuberculin, infants showing positive, while under two years of age, Serial examinations of, 461
Records concerning the exposure of children to tuberculosis, Clinic, 420
Red cell sedimentation reaction, technique of, The, 94
Reinfections, frequently repeated, The influence of, on allergy and immunity in tuberculosis, 316

Relation of serological reactions and tuberculin activity in derivatives of tubercle bacilli, The, 23
Remarks on the coöperation of science and practice in tuberculosis, 597
Repeated reinfections, The influence of frequently, on allergy and immunity in tuberculosis, 316
Resistance to tuberculosis, natural and acquired, the problem of: President's address, 485
RICHDORF, L. F., AND HETZLER, A. E. Clinic records concerning the exposure of children to tuberculosis, 420

Sanatorium, Follow-up information on 1,747 tuberculosis patients one to seven years after discharge from a, 625
Sanocrysin, effect of injections of, on normal and tuberculous dogs, The. Part II: On tuberculous dogs, 533
——, —— ——, on the tubercle bacillus after long exposure in vitro, The, 523
School children, Minneapolis, Tuberculous infection among, as revealed by the intracutaneous test, 454
SCHROEDER, E. C. Present status of the manufacture and use of veterinary tuberculin, 10
Schulte-Tigges and Ziehl-Neelsen methods for staining acid-fast bacteria, A comparison of the, 102
Science and practice in tuberculosis, cooperation of, Remarks on the, 597
Sedimentation reaction, red cell, technique of, The, 94
Serial examinations of children with evidences of primary foci. 428
—— —— —— —— —— pulmonary lesions, 437
—— —— —— infants showing positive tuberculin skin reactions while under two years of age, 461
Serological reactions and tuberculin activity in derivatives of tubercle bacilli, The relation of, 23
Serum, tuberculosis, inhibitive reaction of, The: the nature of the inhibitive substance, 706
Shadows, annular, appearing in radiograms of the lungs, The interpretation of, 58
SIMMONS, JAMES S., AND STEVES, ERNEST J. A comparison of the Schulte-Tigges and Ziehl-Nielsen methods for staining acid-fast bacteria, 102
Skin reactions, tuberculin, infants showing positive, while under two years of age, Serial examinations of, 461
SMITH, THEOBALD. President's address: the problem of natural and acquired resistance to tuberculosis, 485
——, ——. Remarks on the coöperation of science and practice in tuberculosis, 597
Spontaneous pneumothorax in pulmonary tuberculosis, 567
—— ——, treatment of, Deflation of the pleural cavity in the, 80
Staining acid-fast bacteria, A comparison of the Schulte-Tigges and Ziehl-Neelsen methods for, 102
Standardization of tuberculin, methods proposed for the, Discussion of the present, 17
——, Tuberculin, a report of a conference on its, 1
STEVES, ERNEST J., AND SIMMONS, JAMES S. A comparison of the Schulte-Tigges and Ziehl-Neelsen methods for staining acid-fast bacteria, 102
STUCKY, GEORGE C., AND HUNTLEY, W. B. The Kahn test for syphilis in tuberculosis, 724
Studies on tuberculosis in infancy and childhood. VII. Serial examinations of children with evidences of primary foci, 428
—— —— —— —— —— —— ——. VIII. Serial examinations of children with pulmonary lesions, 437
—— —— —— —— —— —— ——. IX. The incidence of physical defects and nontuberculous disease among 2,000 children examined for tuberculosis, 448
—— —— —— —— —— —— ——. X. Tuberculous infection among Minneapolis school children as revealed by the intracutaneous test, 454
—— —— —— —— —— —— ——. XI. Serial examinations of infants showing positive tuberculin skin reactions while under two years of age, 461

Studies on tuberculosis in infancy and childhood. XII. A study of the lung hilum in a group of children examined for tuberculosis, 468
Studies on tuberculous infection. XII. The dissemination of tubercle bacilli in the immune guinea pig, with a discussion of probable factors involved in tuberculo-immunity, 211
—— —— —— ——. XIII. The tracheobronchial lymph nodes of the rabbit and their blood supply, 237
—— —— —— ——. XIV. The localization of tuberculous infection in the rabbit, with particular reference to that in the lungs, 243
—— —— —— ——. XV. Summary, analysis and applications of the studies on tuberculous infection, 271
Study of the lung hilum in a group of children examined for tuberculosis, A, 468
Summary, analysis and applications of the studies on tuberculous infection, 271
Surgery in advanced pulmonary tuberculosis, What can be accomplished by, 69
SWEANY, H. C., AND EVANOFF, MAX. The effect of sanocrysin on the tubercle bacillus after long exposure in vitro, 523
Syphilis, Kahn test for, in tuberculosis, The, 724

Technique of the red cell sedimentation reaction, The, 94
Test, intracutaneous, Tuberculous infection among Minneapolis school children as revealed by the, 454
——, Kahn, for syphilis in tuberculosis, The, 724
THEARLE, WILLIAM H. What can be accomplished by surgery in advanced pulmonary tuberculosis, 69
Therapeutic action of oleum jecoris, An explanation of the, 549
Thoracoplasty, Combined artificial pneumothorax and, 135
Tracheobronchial lymph nodes of the rabbit and their blood supply, The, 237
Treatment of spontaneous pneumothorax, Deflation of the pleural cavity in the, 80
Treatment of tuberculosis, iodine in intensive doses in, The value of, 89
—— —— tuberculous lymphadenitis among American Indians, The, 646
Tubercle bacilli and blood, The pulmonary effects of intratracheal injections of, in rabbits, 306
—— ——, derivatives of, The relation of serological reactions and tuberculin activity in, 23
—— ——, The dissemination of, in the immune guinea pig, with a discussion of probable factors involved in tuberculo-immunity, 211
Tubercle bacillus, effect of sanocrysin on the, after long exposure in vitro, The, 523
—— ——, The principles of bacteriological chemical analysis and their application to the, in reference to the large-scale production of tuberculin, 30
Tuberculin, a report of a conference on its standardization, 1
—— activity, The relation of serological reactions and, in derivatives of tubercle bacilli, 23
——, production of, large-scale, The principles of bacteriological chemical analysis and their application to the tubercle bacillus in reference to the, 30
—— skin reactions, infants showing positive, while under two years of age, Serial examinations of, 461
——, standardization of, methods proposed for the, Discussion of the present, 17
——, veterinary, manufacture and use of, Present status of the, 10
Tuberculo-immunity, probable factors involved in, The dissemination of tubercle bacilli in the immune guinea pig, with a discussion of, 211
Tuberculosis, allergy and immunity in, The influence of frequently repeated reinfections on, 316
——, contagion of, The, 347
——, exposure of children to, Clinic records concerning the, 420
——, historical and epidemiological observations on, Certain, 177

Tuberculosis hospitalization in the United States, 600
—— in infancy and childhood, Studies on, VII. Serial examinations of children with evidences of primary foci, 428
—— —— —— —— ——, —— ——. VIII. Serial examinations of children with pulmonary lesions, 437
—— —— —— —— ——, —— ——. IX. The incidence of physical defects and nontuberculous disease among 2,000 children examined for tuberculosis, 448
—— —— —— —— ——, —— ——. X. Tuberculous infection among Minneapolis school children as revealed by the intracutaneous test, 454
—— —— —— —— ——, —— ——. XI. Serial examinations of infants showing positive tuberculin skin reactions while under two years of age, 461
—— —— —— —— ——, —— ——. XII. A study of the lung hilum in a group of children examined for tuberculosis, 468
——, Kahn test for syphilis in, The, 724
——, localization of, in the organs of different animals, The variability of. I. Quantitative relations in the rabbit, guinea pig, dog and monkey, 662
——, —— ——, —— —— —— —— ——, —— —— ——. II. The importance of the distribution of tubercle bacilli as concerns differences of susceptibility of the organs, 680
